Core Qualification & Tech Stack

Education: Bachelors in Computer Applications (2014-2017)

University: Guru Gobind Singh Indraprastha University

- **Programming Languages:** C, Python, Java, GoLang
- **Web Development:** JavaScript, ReactJS, NextJS, NestJS, NodeJS, ExpressJS, Spring Boot, Django, Flask
- **Database Management:** MongoDB, Redis, SQL, DynamoDB
- **Cloud Platforms:** AWS (EC2, S3, Lambda, RDS), Azure, Google Cloud Platform (GCP)
- **Version Control & CI/CD:** Git, Bitbucket, Jenkins, GitHub Actions

Experience

SOFTWARE DEVELOPER, (FOUNDATION FINANCE COMPANY)

LOCATION: HYDERABAD, TELANGANA

DURATION: SEPTEMBER 2024 – PRESENT

- Established a microservice architecture using Nest.js and Kafka, enhancing scalability and reducing inter-service latency by 30%.
- Developed a dynamic frontend system to manage workflows, schedules, and CRON jobs, enabling 100% configuration via UI without requiring code changes, reducing deployment cycles and manual intervention.
- Collaborated in Agile Scrum teams, participating in sprint planning, reviews, and daily stand-ups, ensuring timely delivery and alignment with project goals.
- Managed CI/CD pipelines on AWS, achieving 40% faster deployments and maintaining 95% system uptime.
- Increased test coverage to 85% using Jest, enhancing application reliability and reducing post-deployment bugs by 20%.

FULL STACK DEVELOPER, (REVFIN)

LOCATION: HYDERABAD, TELANGANA

DURATION: APRIL 2024 – SEPTEMBER 2024

- Developed and deployed the Video KYC module (React frontend, Spring Boot backend), improving customer verification efficiency and reducing manual effort by 50%.
- Built the Tele-Verification module from scratch, enabling underwriters to verify applicant references, reducing verification timelines by 35%.
- Designed the Application Readiness module to verify document completeness, reducing approval/denial decision time by 40%.
- Actively contributed to Agile Scrum processes, participating in sprint planning, stand-ups, and retrospectives, improving development velocity by 15%.
- Streamlined deployments with CI/CD pipelines on AWS, ensuring smooth production releases and 99.9% uptime.

SOFTWARE DEVELOPMENT ENGINEER, (FREELANCER.COM)

LOCATION: NEW DELHI, INDIA

DURATION: MAY 2018 - APRIL 2024

- Delivered 30+ full-stack projects using React.js, Node.js, and MongoDB, ensuring timely and cost-effective delivery for global clients.
- Enhanced distributed systems with C++, Python, and Java, improving system performance by 25% and enabling handling of 10K+ concurrent users.
- Built cross-platform mobile apps with React Native, increasing user engagement by 40%.
- Optimized SQL and MongoDB queries, reducing response times by 50% and improving overall system efficiency.
- Explored frameworks like Go (Gin/Fiber) for backend development and optimized performance-critical systems.

Projects

HOSPITAL MANAGEMENT SYSTEM

- Developed using C++ (using OOP), focusing on patient information management and appointment scheduling.

TAROT CARD READING APPLICATION

- Built with Next.js, Node.js, Express, MongoDB, Typescript and AI for a dynamic Tarot Card Reading experience.

SPOTIFY CLIENT APPLICATION

- Developed using the MERN stack (MongoDB, Express.js, React.js, Node.js) and used Spotify's Web SDK player, along with OAuth2 for logging into Spotify.
- Letting users play and pause songs from specified start and end points and letting them queue songs.

LIBRARY MANAGEMENT SYSTEM

- Developed using JAVA (implementing OOP concepts). Created classes to manage members, books and parent class Library which was inherited by other classes.
